Community Crops Youth Programs connect youth to the origins of their food and help them understand the impact of food choices on their lives and health. We provide students a fun environment to discover where food comes from, how it grows and how to prepare fresh produce. This will help them establish life-long healthy habits. Bringing children outdoors to have fun, interact with the soil, and grow their own food is not only healthy, but provides for a healthy community.

How to Volunteer
Community Crops can offer you or your company a customized volunteer experience, for one person or a group. We need volunteers in our gardens, at our farm and office, and during our events. To volunteer or for more information, please call us at 402.474.9802.

Crops Presentation and Classes
Interested in learning more? You can invite our staff to share their knowledge on a variety of gardening and nutritional topics. Call the office to schedule a presentation for your group.

Donate
Community Crops is a 501(c)(3) nonprofit organization that relies on community support for our programs. You can make a difference with a monetary or supply donation (such as tools, plants, seeds, land, office supplies - call our office for more information).

Get involved in Crops programs
- Take a cooking, gardening, or farming class from us!

- Recognition in our Newsletter (3000 recipients)
- Recognition at all Crops Events, on Crops website (2600 hits per mo) and in Crops annual report

Call us at 402.474.9802 for more information.
At Community Crops, we envision a healthy community for everyone – one in which all families can grow their own food, one where new farmers are supported through the challenges of growing healthy food for their community, and one where every child has a chance to cultivate a garden alongside their regular lessons in math, English and science.

Your support will realize this vision for our community.

Growing Farmers Training Program

Community Crops provides training, technical assistance and land access to beginning, immigrant, and limited-resource farmers so they can create sustainable farm businesses to feed their families and their community.

Each year through our program, twenty-five beginning farmers learn the basics of starting a viable farm business. Graduates are then eligible to join the three-year, training program at our farm site, Prairie Pines Training Farm. Through Crops’ efforts during the past eight years, over 200 people have received in-depth training. 14 existing farms have improved their operations and 60 graduates have started their own farm businesses.
